46395 Bocholt (Germany)

About API

API seals was founded in the year 1985 and is your ideal service partner for seals, wich are optimized for mining- and industrial hydraulics.

We take our know how from the knowledge of the world market leaders and we just find the right solution from our pallet of products for you.

We work tight together with our mother company the Heynck Group, wich is one of the market leader in building and renewing mining hydraulics. We give this knowledge directly to our customers.

Because of this API offers a wide pallet of seal systems. These systems are suitable for new and renew hydraulic cylinder.

We offer saels by the following producers:

- Hallite
- Merkel
- Dozut
- SFK
- Seal Concept

Together with our customers and producers we develop permanent new solutions and products.

Nature and pollution control is a self-evident obligation.

Speciality

The heavy hydraulic is our speciality. Here we have normally high pressure and crosswise power. Strong soiling because of internal and external sources are unavoidable, as well as regular use under high pressure with always returning pressure push for example through shocks in the mountains.

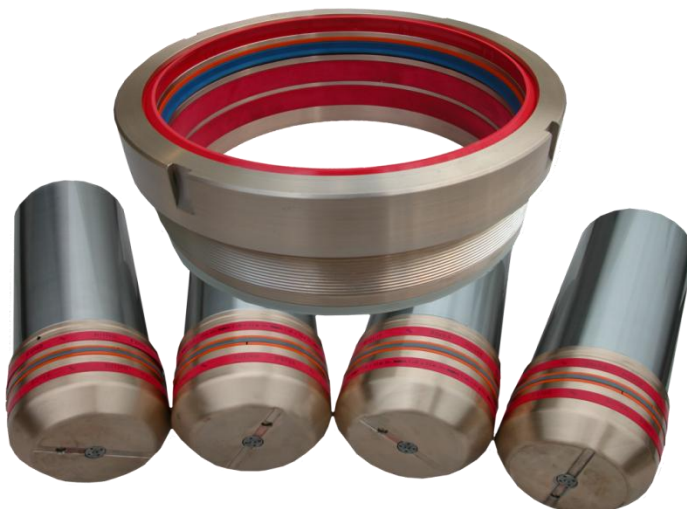

Quality and Tradition

Manufacture first class products for a sure employment in critical use with varied special expectations needs more than excellent design, development and production

To get the highest standart in all the interests of our clients and products and to guarantee that permanent all orders, products and services must constantly be under control. We vouch for that!

All our suppliers are certified after DIN ISO 9001:2000.

We deliever for you all seals for european made hydraulic cylinder (for example DBT, Kopex, Tagor, Gullick Dobson..)!

DICHTUNGEN

We like to advice you

Dichtungen für Ihre Hydraulikprodukte
Sealings for your hydraulics
